

EDMONTON FURNACE QUOTES

What your written furnace quote should contain · a one-page checklist

Edmonton, Alberta · furnace replacement and repair

no charge to you

we do not quote the work

We do not do the work and we do not quote for it, so there is no price here. A licensed contractor quotes you. These are the things worth having on paper before you agree to anything.

A WRITTEN REPLACEMENT QUOTE SHOULD CONTAIN

- ☑ **The price, in writing, before work starts.**
Ask for it by email so there is a record of what was quoted, not just what was said on the phone.
- ☑ **Whether the permit is included.**
Ask whether the price covers the permit for the installation, and who pulls it.
- ☑ **Whether removal and disposal of the old furnace is included.**
It is a separate line on some quotes and built into others — either way, know which one you are looking at.
- ☑ **What make, model and size is being quoted.**
Two prices only compare if you know what equipment each one is for.
- ☑ **The contractor's Alberta licence.**
Ask for the licence number and check the contractor's standing before you sign. A licensed contractor hands it over without blinking.

A WRITTEN REPAIR QUOTE SHOULD CONTAIN

- ☑ **The price, in writing, before work starts.**
Ask for it by email so there is a record of what was quoted, not just what was said on the phone.
- ☑ **Whether the diagnostic or trip charge is separate.**
Many contractors charge to come out and diagnose before any repair is agreed. Ask what that charge is, and whether it comes off the repair price if you go ahead.
- ☑ **What the part is, and why it is the one being replaced.**
Ask for the part named in writing, so a second opinion can tell whether the same fault was found twice.
- ☑ **What is covered after the repair, and for how long.**
Ask whether the part and the labour carry any guarantee, and for how long. Know it before you agree, not after.
- ☑ **The contractor's Alberta licence.**
Ask for the licence number and check the contractor's standing before you sign. A licensed contractor hands it over without blinking.

WHAT THIS LIST IS NOT

We do not install, repair or service furnaces, and we do not quote for them — a licensed contractor does that.
There is no price on the site this list is drawn from, and no contractor is named, rated or reviewed on it.
There is no charge to you, and you are never obligated to buy.
